

Cobblestone Mulch

AGRISERVICE Quality Parameters

Product Description and Production Benefits Application

- Cobblestone Mulch is dry screened to approximately 6" minus. All sizes are approximate and may contain sizes larger than specified.
- There will be cobble with broken faces, some dirt attached to the cobble or mixed in with the cobble.
- Colors vary and are primarily earth tone browns with some purple and various shades of each.
- All colors are exposed once the cobble is placed and rinsed with a hose.
