

Amendments

Composted soil amendments are used to improve and maintain the health of your soil and plants. Our composting process includes a pathogen reduction process to kill weed seeds, harmful pests and pathogens. The final composted products contain beneficial microbes and nutrients that are slowly released into the soil for plant absorption.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
Humic Compost	Composted Amendment, 3/8" Screened	\$12	\$11	\$9
Custom Amendment	Blended for Specific Needs	Call for pricing.		

Soil Products

Soil Products are used to raise soil levels, fill planter beds or replace poor soil. Our base soil is tested for agronomic suitability and texture.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
70/30 Topsoil	70% Sandy Loam Textured Soil, 30% Humic Compost	\$20	\$20	\$20
Non-amended Topsoil	Sandy Loam Textured Soil	\$20	\$20	\$20
Bioswale 65	65% Sand, 20% Topsoil, 15% Compost	\$43	\$43	\$43

Mulch Products

Mulch is used as groundcover to reduce water evaporation, erosion and weed seed germination. Mulch breaks down over time increasing the organic matter in soil. This process improves soil tilth, which improves water infiltration, increases the soil's water holding capacity, and creates a nutrient reservoir. Three feedstocks are used to produce our products: *Composted organics, brush and tree wood and construction wood.*

Composted mulch is rich in organic matter that holds well on slopes and can withstand high winds. Our composted mulch products are dark brown in color and will supply nutrients and beneficial microorganisms.

Agri Service products are manufactured from organic material diverted from the landfill. While we make every effort to remove debris from our feedstock, our finished products may contain small amounts of residual waste material.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
Orchard Mulch (OIM)	Composted, Course, Some pieces larger than 3", Some Foreign Material, Agricultural Quality, Organic Input Material (OIM) certified for organic crop production	\$6	\$5	\$4
Ag Grind Mulch	Composted, 3" Minus, Some Foreign Material, Agricultural Quality	\$6	\$5	\$4

Mulch Products *(continued)*

Brush and tree wood is used to make our Forest Mulch products. These feedstocks provide organic matter, hold well on slopes and can withstand high winds. Forest Mulch products are a medium brown color, which helps camouflage plant litter.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
Forest Fines	1 ½" minus, Ground Brush and Tree Trimmings	\$17	\$16	\$14
Forest Mulch	3" minus, Ground Brush and Tree Trimmings	\$17	\$16	\$14
Mission Mulch	3"- ½", ½" minus material screened to remove fines	\$26	\$25	\$24

Our **wood mulch** products, produced from clean construction wood, are a light brown color and break down slowly. These products are often used as long lasting material in pathways or as mulch for plants with low nitrogen requirements.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
Bedding Mulch	1" minus, Ground Wood	\$25	\$24	\$22
Trail Mulch	2" minus, Ground Wood	\$25	\$24	\$22
Landscape Mulch	3" minus, Ground Wood	\$25	\$24	\$22

Our **blended mulch** products combine Ag Grind Mulch and Forest Fines to create a nutrient rich and aesthetically pleasing product.

Product	Description	Pricing per Cubic Yard		
		1-24	25-99	100+
Country Club Blend	50% Ag Grind and 50% Forest Fines, Landscape Quality, Some Foreign Material	\$15	\$14	\$13
Everbloom Mulch	80% Ag Grind and 20% Forest Fines, Landscape Quality, Some Foreign Material	\$12	\$11	\$9
